I worked on my assigned OPT project during the past two weeks

- ☒ **True**
- ☐ False

I would summarize my activity during this time period as follows:

I would characterize my work during this time as creating and executing an experiment to identify possible bias in sports data narratives produced by LLM. I developed and tested several prompt changes, examined model responses for framing and sentiment impacts, verified findings against actual data, and recorded results in an understandable, repeatable report.

Upon reflection, this project is allowing me to learn or refine the following STEM-related skills:

My STEM abilities in data analysis, Python programming, statistical testing, and working with machine learning models were all strengthened by this project. Additionally, I became more adept at creating controlled tests, verifying findings, and objectively interpreting data-driven insights.
